Green Bottom, WV  
General Jenkins Old Homestead  
House & Wetlands Elevations

Report of Survey

This survey was done April 06, 2001, to establish the elevations of the first floor, basement, and Low ground at the house of the late General Jenkins, at Green Bottom West Virginia. Mr. David Long of EC-TI, and Mr. Todd Mitchell of EC-DC, preformed the survey. A Wild NA2002 Level was used to run The single wire differential levels to establish the elevations. The benchmark used was BM 197 / 28B, a chiseled square set during job No. 60/9 from BM 198 / 3C = horizontal position 122/20. The elevation of BM 198 / 3C was established from NGS BM D-116.

This job package is for your review and records.
